## PROFILE

Hi, I'm Eyosias Alemayehu, an 18-year-old full-stack and mobile app developer with a passion for clean code and creative problem-solving.

I build fast, user-friendly apps — from front-end design to back-end logic — using stacks like MERN, LAMP, Flutter, and React Native.

- I specialize in:
- Full-Stack & Mobile Development
- Debugging & Testing
- API Integration & Database Design
- Performance & UI/UX Optimization
- Always learning and improving, I turn ideas into real-world solutions that are smooth, scalable, and effective.

## WORK EXPERIENCE

### Task Manager

A responsive task management app with drag-and-drop functionality and local storage support for seamless offline use.

- Developed an intuitive drag-and-drop interface for task organization
- Implemented priority-based task sorting for better productivity workflows
- Integrated local storage to persist user data without backend dependencies
- Focused on clean, modular code and user-friendly UI/UX design
- Optimized for both desktop and mobile devices

### Akaki Adventist mission School website

- Collaborated with the IT team to redesign the school's website, improving its layout, user experience, and accessibility.
- Used HTML and Figma to develop wireframes and prototypes based on updated content and branding guidelines.
- Assisted in setting up and maintaining computer systems across classrooms and offices.
- Provided technical support to teachers, ensuring smooth operation of digital tools during lessons.
- Oversee market research to identify emerging trends, customer needs, and competitor strategies.

### Personal Blog website

#### Marketing Manager & Specialist

- Designed and developed a personal blog website to share articles on [e.g., tech, programming, lifestyle—customize this].
- Built the site using HTML, CSS, and basic JavaScript for a clean, responsive user experience.
- Created the layout and UI design using Figma, focusing on readability and mobile-first design.
- Regularly write and publish blog posts, integrating features like categories, tags, and a contact form.
- Optimized site performance and SEO to increase visibility and engagement.
